Typical Applications:

EXCELLENT: Pre-Emerge Herbicides—For band application of surface applied herbicides. Used at medium pressures (2–3 bar) to produce medium size droplets and to control drift.

EXCELLENT: Post-Emerge Systemic Herbicides—Used at lower pressures (2–3 bar) for banding systemic herbicides.

GOOD: Post-Emerge Contact Herbicides—For band application of contact herbicides, used at 3 bar and above to produce small droplets for better coverage.

Features:

- Pre-Orifice design produces large droplets to reduce drift.
- Ideal for banding over the row or in row middles.
- Provides uniform distribution throughout the flat spray pattern.
- Easily mounted on spray boom or planter.
- Tip material – Stainless Steel with VisiFlo color coding
